DOMAIN SELECTION AND TESTING

Test domains were selected to represent a grouping of popular publisher and news sites.

abcnews.com
cbsnews.com
cnn.com
foxnews.com
huffingtonpost.com
latimes.com
msnbc.com
time.com

To simulate realistic end-user conditions, testing was performed across a range of physical devices, from three different locations.

Device data connections were proxied using Charles Proxy software, which was also used for network traffic capture and analysis.

Phone testing was performed in portrait orientation.

Tablet testing was performed in landscape orientation.

BENCHMARK MEASUREMENTS
